EXECUTIVE SUMMARY

Technical Business Analyst with 6+ years of experience bridging business requirements and technical delivery across enterprise data integration, CRM/business systems, analytics and process automation. Experienced in requirements analysis, business-to-technical translation, data-flow and dependency mapping, data quality, solution validation and production support across multi-country enterprise programmes.

Currently working with WorkShop International AB in Sweden, supporting Google, Samsung and Adidas client programmes across Nordic and European markets. Combines hands-on Snowflake, SQL, Python and Salesforce expertise with a progression from Excel/Power Query data operations to modern ETL/ELT and AI-assisted automation.

PROFESSIONAL HIGHLIGHTS

- Supported enterprise data, CRM and field-operations programmes for global brands including Google, Samsung, Adidas, SquareTrade, Telenor, Canon, Sonos and Castrol through WorkShop International AB.
- Translate business and operational requirements into data models, transformation rules, integration workflows, Salesforce configuration and reliable production processes across multi-market environments.
- Designed and automated Snowflake SQL and Python workflows that reduced a business-critical Google retail reporting process from approximately 2 working days to 2 hours.
- Administer Salesforce environments supporting large retail and field-force operations, including pan-European Adidas master data and targets, plus Nordic telecom, insurance and consumer-brand programmes.
- Designed and maintain a Salesforce Data Management framework documenting client data sources, ingestion/transformation steps, dependencies, update frequencies, validation rules and operational procedures.

CORE TECHNOLOGIES

Business Analysis: Requirements Gathering & Analysis, Business-to-Technical Translation, Stakeholder Management, Process Analysis, Backlog Management, Requirements Traceability, Gap & Impact Analysis, Root Cause Analysis, UAT Support, Solution Validation

Data & Integration: Snowflake, Advanced SQL, Data Integration, ETL/ELT, Data Modelling, Data Source & Flow Mapping, Data Lineage, Data Reconciliation, Fivetran, SFTP, SOQL

Programming & Automation: Python, Google Apps Script, Power Query, Process & Workflow Automation, Reporting Automation, Data Validation Automation

Enterprise Platforms & Analytics: Salesforce Administration, CRM & Master Data Management, User & Access Management, Google Workspace, Tableau, Power BI, KPI & Enterprise Reporting

AI & Emerging Technology: Generative AI, Prompt Engineering, AI-Assisted Analysis, Coding & Solution Design, AI Output Validation

PROFESSIONAL EXPERIENCE

WorkShop International AB | Sweden

Business Analyst – Data Integration & Business Automation (2020 – Present)

Current Client Programmes: Google (Nordics, Germany & Poland) | Samsung (Nordics) | Adidas (Europe)

Previous Client Programmes: SquareTrade | Telenor | Canon | Sonos | Castrol

- Gather, analyze and document business and technical requirements, translating operational needs into data models, transformation rules, integration workflows, automation, Salesforce configuration and reporting solutions.
- Manage client support and development requests through Asana, maintaining priorities, dependencies, traceability and stakeholder updates from initial request through implementation and completion.
- Map and manage end-to-end data flows across source files, email, Google Sheets, SFTP/Fivetran, Snowflake, Salesforce and downstream reporting, documenting interfaces, business rules, validation steps and operational dependencies.
- Design, develop and optimize Snowflake ETL/ELT workflows using advanced SQL and Python; progressed legacy/manual Excel and Power Query processes into more reliable, repeatable and automated data operations.
- Administer Salesforce across multi-country client programmes, managing users, access, account/store master data, ownership, targets and data quality; environments supported include ~2,000+ Adidas accounts and large Nordic field-force operations.
- Perform root cause analysis and solution validation through reconciliation, integration/regression testing, defect investigation, correction and retesting, UAT support and ongoing production support.
- Maintain recurring client data/reporting operations across retail, telecom, insurance, consumer electronics, audio and automotive programmes, supporting international stakeholders, Team Leads, Business Managers and field teams.

Key Achievements

- Transformed a Google retail data process spanning 15+ recurring inputs across the Nordics, Germany and Poland, using Snowflake, SQL and Python automation to reduce weekly processing from ~2 working days to ~2 hours.
- Designed and delivered a Snowflake-to-Google Sheets integration platform replacing a subscription-based solution, automating six operational datasets and validating 26,000+ records during production testing.
- Operationalize Adidas seasonal doorlists across a pan-European Salesforce programme: reconcile stores against account master data, resolve missing/changed doors, assign trainer ownership and load physical/digital targets used by field operations and management reporting.
- Built and maintained multi-source SquareTrade data processes covering policy sales, cancellations/churn and hit-rate data, using Snowflake transformations and Salesforce to support Nordic field operations; also maintain production data processes for Telenor SIM orders, activations and top-ups after technical handover.

EDUCATION

Master's-Level Studies in ICT for Development | Stockholm University, Sweden

Advanced coursework in IT Management, Strategic IT, Technology-Enabled Change, Risk & Decision Analysis, and Computer Science Project Work.

Postgraduate Studies in Information Technology | KTH Royal Institute of Technology, Sweden

Completed coursework in Mobile Business, organisational dynamics, and technology management.

Master of Computer Science (MCS) — Al-Khair University, Pakistan

Bachelor of Science (BSc), Computer Science — Bahauddin Zakariya University, Pakistan
